

Our Policy

Access Waste Recycling is a family owned business which provides waste management services at all levels of the waste hierarchy. Our business includes the collection, segregation and recycling of waste.

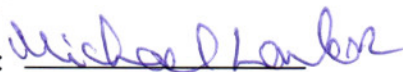

Access Waste Recycling consider environmental protection as an essential part of the waste management business and are committed to maintaining a high standard of environmental quality through all activities.

Access Waste Recycling will;

- Comply fully with all requirements of relevant legislation, regulations and voluntary standards
- Communicate our policy to all employees and sub-contractors
- Train and support all staff to help achieve our objectives and targets in sustaining Access Waste Recycling as an environmentally responsible service provider and employer
- Promote 'pay by weight' wherever possible using the 'polluter pays policy' principle, maximising recycling and minimising waste.
- Promote best work practices to prevent any risk to the environment
- Make our policy available to all interested parties and to the public.
- Promote recycling and find markets for our recovered materials
- Continue to review and improve our objectives and targets to help us create a better environment for all

Whilst all employees have a duty to ensure that operations do not cause environmental damage, the overall responsibility for environmental protection lies with managing directors of Access Waste Recycling
